SPRING BALANCER

What is Spring balancers?

The tension is kept stable on even if the cable is pulled out or retrieved because of the tapered drum. So Spring balancers can hold the tools suspended in hollow and work for flexible positioning of the tools. Workers can enjoy comfortable operation with less fatigue.

Location of use

- Suspending a tool for product assembly line.
- Frequent fastening screws, bolts and nuts.
- Suspending a jig, tool, welding gun etc.

Advantages

- The balancers improve working efficiency and diminish worker fatigue.
- The balancers make the position of a tool stable and contribute to accurate work.
- The balancers are available for keeping a tool not damaged.
- Any electric or pneumatic power is not required and safe working is achieved.

SPRING BALANCER

How to adjust spring tension

Worm gear system, Ratchet system or Handle system are available and dependent on the models. Clockwise adjustment increases the spring tension and Counter clockwise adjustment decreases the spring tension. (The spring tension has been set at the middle of capacity in advance prior to shipment)

Handle system	ERP model				
Ratchet system	EK-00,EK-0	EW-3,5	SBC	ER model	ATB model
Worm gear system	EWS model	EWF model	ELF model	RSB model	
	ETP model	THB model	ATR model	EWA model	

Handle system

Ratchet system

Worm gear system

Read the instruction manual carefully for details.

Features

※All features are not always available on all balancers.

Fall arrest device

When spring brakes, safety pin pops out and collides with pin fixed or case to prevent the suspended tools from falling.

Drum lock device

By changing the position of the pin, you can lock the drum rotating. It provides easy tool/wire rope replacement.

Gauge

The gauge indication contributes to worker recognition on tension adjustment.

Secondary support hanger

The secondary support hanger is available on every model.

Cartridge spring assembly

Cartridge spring provides easy and safe spring replacement.

Wire rope replacement

The plug fixing system provides the easy cable replacement.

SPRING BALANCER

Summary

Type	Model	Capacity(kg)	Stroke (m)	Cable dia (φmm)	Mass (kg)	CE

* A nylon rope is employed for CE market instead of a nylon coated cable.

Selection of suitable model

Always use a suitable model meeting the total weight of suspended tool or instrument. The balancer should be selected considering the weight of the tool and accessories.

Installation

- Install Spring balancers uneven not to hit each other when the balancers are installed in a line.
- Always employ a secondary support chain and leave the slack for smooth swivel.
- Always adjust the spring tension to meet the total weight of tool and the application.

Many safety features are equipped and they are most popular. For a welding gun, Pneumatic tool etc.

- Always adjust the spring tension to meet the total weight of tool and the application.

Spring balancer with cable snap back prevention device

Features

In case that a cable installed in a spring balancer is cut or a suspended tool is disengaged, the cable will snap back due to the tension of spring involved in a spring balancer, causing the dangerous situation such as the injury to personnel etc. This new device has developed to protect personnel from such the danger.

Description of the device

As soon as a cable is cut, a drum revolves rapidly winding a cable up. Rapid revolution of the drum generates centrifugal force. The centrifugal force makes a Ratchet on a spring case pushed out and the ratchet sticks in a wheel fixed on a cover, stopping the revolution of the drum.

Spring balancer with brake system

Features

It uses one-way clutch lining braking system and it hangs up tools slowly.

Snap back with slow speed helps speedy and safe work for you.

Set brake free, you can use it as a normal balancer.

Model	Capacity(kg)	Stroke(m)	Cable dia(φmm)	Mass(kg)
EWF-3B	1.5-3.0	1.3	3.0	4.7
EWF-5B	3.0-5.0	1.3	3.0	8.9
EWF-7B	5.0-7.0	1.3	3.0	9.3

FUNCTION

Fall arrest device

Drum lock device

Worm gear spring adjustment

CE Mark available

Features

Instead of the wire rope, the urethane hose is wound and air tools can be easily moved up and down.

Casing and drum are made of acrylonitrile butadiene-styrene resin and they are light.

The diameter of hose nipple is $\phi 9\text{mm}$ at inlet portion.

And swivel joint size Rc.1/4 at outlet portion.

Working conditions

- Application area : Indoor and normal atmospheric conditions
- Temperature rang : -10°C to $+40^{\circ}\text{C}$
- Application fluid : Air
- Maximum air pressure : 1.0MPa {10kgf/cm²}

Model	Capacity(kg)	Hose travel (m)	Air Inlet.(ϕmm)	Mass(kg)
ATB-0	0.5-1.5	1.3	6.3	1.58

Accessories

Protect wire set

Product number	Available model
LBP000794	ATB-0,1,2

The protector is available for tool fall protection caused by unintentionally detaching an air tool from a coupling.

Tool hose balancers THB

Features

Instead of the wire rope, the urethane hose is wound and air tools can be easily moved up and down.

When the spring failure is happened, the fall prevention device will operate and stop the suspended tool or device.

The inside diameter of hose is $\phi 8.5\text{mm}$ which supplies enough air to operate the suspended air tool or device.

Working conditions

- Application area : Indoor and normal atmospheric conditions
- Temperature rang : -10°C to $+40^{\circ}\text{C}$
- Application fluid : Air
- Maximum air pressure : 1.0MPa $\{10\text{kgf/cm}^2\}$

Model	Capacity(kg)	Hose travel (m)	Hose inside diameter. (φmm)	Mass(kg)

Parts No. LBP000654

Swivel Joint

Parts No. LBP000659

Protect wire

Parts No. LBP000801

The protect wire prevents accidental dropping and / or disconnection between the hose and tool.

Coupling socket (Outer dia 11.3mm)

Parts No. LBP000784

Adjustable hose stopper

Parts No. LBP000800

Special hose for an extended length (with a swivel joint ;1m)

Parts No. LBP000785
(max. 2m extension)

Features

An included spring works to retract a hose into the device automatically.

A contained hose solves the short of air consumption for air tool owing to a large inner diameter of 10φ.

A ratchet system applied for the device can keep a tool suspended at any position on the hose travel where you want.

※On-off work of ratchet system is available through knob operation.

The fall preventive system from the tool drop works when the included spring has been broken.

ATR-5 is installed with top hook and ATR-5-1 is installed with bracket.

Features

This model can be stopped on the way of cable travel because of ratchet system.(-A type)

The jamming of the cable will not occur because of its cylindrical drum.

They has long cable travel (ER-3A/3B, ER-5A/5B=3m, ER-10A/10B=4m) and are designed light and compact.

FUNCTION

Ratchet system
spring adjustment

Cushion cover
available

CE Mark available
※Only ER 3A/ER 3B is available for
CE Mark.

Model	Initial Max. tension (tension at retracted)		Active cable travel (m)	Tension build-up, full length of cable		the number of available spring winding	with or without ratchet	Diameter of cable (φmm)	Mass(kg)
	N	{kgf}		N	{kgf}				
ER-3A	18	1.8	3	12	1.2	about 16	○	2.38	1.4
ER-3B	18	1.8	3	12	1.2	about 16	×	2.38	1.3
ER-5A	25	2.5	3	25	2.5	about 13	○	2.38	1.5
ER-5B	25	2.5	3	25	2.5	about 13	×	2.38	1.4
ER-10A	49	5.0	4	49	5.0	about 13	○	2.38	4.5
ER-10B	49	5.0	4	49	5.0	about 13	×	2.38	3.8

(note) The tension increases gradually as the cable is pulled out. For example, on ER-5A, supporting that the tension of spring is adjusted at 25N (2.5kgf) when the cable is fully retracted, the tension of spring (when the cable is pulled out 3m) is equal to 50N (25+25) (2.5+2.5=5kgf)

Tension curves

The relation with the number of drum revolving and the length of winding cable

The length of winding cable per one revolving of drum **ER-3A/3B,5A/5B** ... about 350mm **ER-10A/10B** ... about 480mm

Insulation Hook

Parts No.	Diameter of cable (φmm)	Available model
LBP000145	4.0	EWF-9・15
LBP000146	4.76	EWF-22-70, EWA-22-70
LBP001185	4.76	EWF-90-120, EWF-90A-120A

Owing to insulation of holder, it becomes unnecessary to use the insulation made of ceramic (or others) which is casual at present.
This composes one set with special cable.

Adjustable cable stopper

Split type

Plug-in type

Type	Parts No.	Available model
Split	LBP000127	RSB-15-40
	LBP000150	ER-3A/3B-ER-10A/10B
Plug-in	LBP000151	EW(EWS)-3-7, ELF-3-9
	LBP000131	EWF-9/15
	LBP000132	EWF-22-70, ELF-15-70, EWF-90-120, EWF-90A-120A

Karabina

Parts No.	Breaking load
P2S400104	16.7kN {1700kgf}

S Type hook

Model	Parts No.	Working load	Mass(kg)
SH-60	LBP000231	590N {60kgf}	0.16
SH-150	LBP000232	1470N {150kgf}	0.43

Swivel hook

The swivel hook enables 360° flexible operation.
If you do rotation work, the swivel hook reduce cable damage.

Parts No.	Available model
P2B401118	EWF-22-70

Plain trolley

Buffer set
Parts No. LBP000771

Model	Capacity(kg)	Minimum radius for corner (mm)	Beam widths(B) (mm)	Mass(kg)
PTF-60	60	—	75	0.8
PTF-125	125	600	50/75	1.6
PTF-250	250	900	75/100/125	4.2

Several kind of balancers can not be connected with plain trolleys directly.
Please use a Karabina for connection.

※ EWF-90—120 is including EWF-90A—120A.

EWF-Type-X / EWF-Type-Y

Features

- The world's first "Eco-Friendly" spring balancer
- Synthetic food grade grease (H1 grade)
- High potential capability and endurance
- Flexible adaptability in a wide range of 1-120kg models

For the next generation

Through the development of the product that is environmentally friendly,
we contribute to the sustainable development of community.

EWF-Type-C

Plastic Drum

Abrasion Powder is greatly reduced comparing with the existing model.

Fall Arrest Device

Drum lock system is equipped to prevent to fall the tools in case of the spring breakage.

Replaceable Wire rope

Easy wire rope replacement is provided with the plug-in method.

Riveted Spring

Outer riveted spring helps safety replacement of the spring.
